Education

BS	**University**, course of study	Time Start - Time End

- Some bullets you want to add here
- You could also just add plain text or any other stuff you want

Experience

Company, Title	Time Start - Time End

Itemize or plain Text as you want. You can also customize the section names.

Skills

Keyword: List of Skills

Explaination

The CV contains multiple different sections as shown in this example. The section heading are customizable and the entrys can be used multiple times.

Header

The Header is created by the `\makecontactheader` command. That command takes a comma separated list to place under the authors name. This list may contain Icons and links. Some of them are already simplified by a command that has the same name as displayed in the header of this document. Those commands add an Icon and the link for the provided username if appropriate.

EduEntry

Usage: `\eduentry{Degree}{University}{Course of study}{Dates}{Some Additional info}`
The EduEntry makes a table with 3 columns. The first contains the degree and the last the Dates. The University is bold and the course of study follows. The Additional Info can pe plain text or an itemize etc.

ExpEntry

Usage: `\expentry{Company}{Title}{Dates}{Some Additional info}`
The ExpEntry is the same as the EduEntry without the Degree Column.

Entry

Usage: `\entry{Keyword}{Text}`
Just a simple entry with a bold Keyword and normal Text.

Color

The primary color is set by `\primary{DodgerBlue4}` and expects a sting with an x11 name of a color (see the xcolor package documentation).
